Measurement

Rock around the Clock

Aim

- To tell and show the time to five minutes.

Success Criteria

- I can count clockwise in 5s to find 'minutes past'.
- I can count anticlockwise in 5s to find 'minutes to'.
- I can say how many minutes past or to the hour it is.
- I can use the minute hand to show five minute intervals.

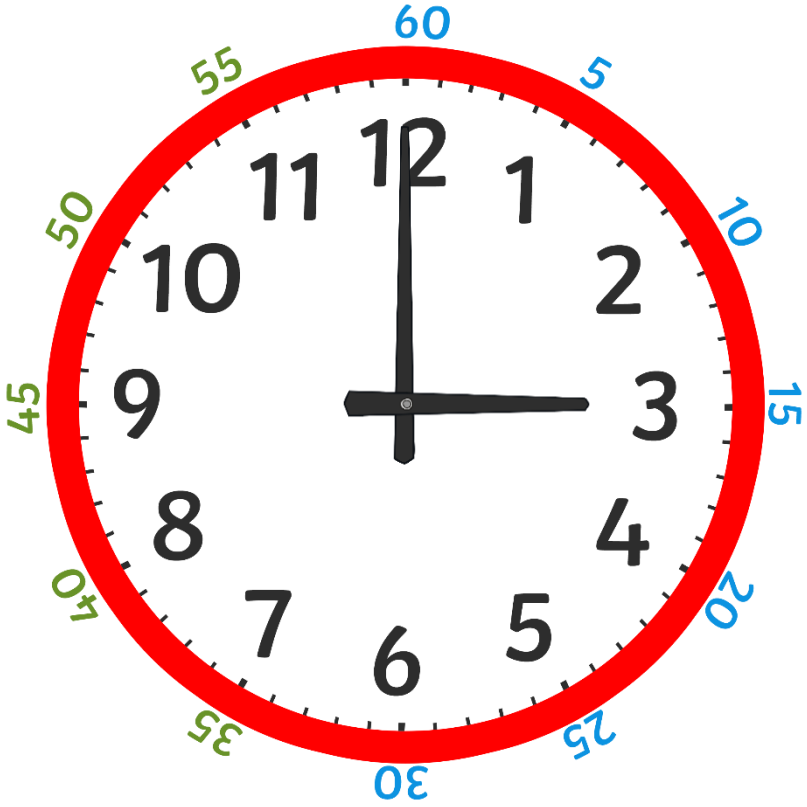
To and Past

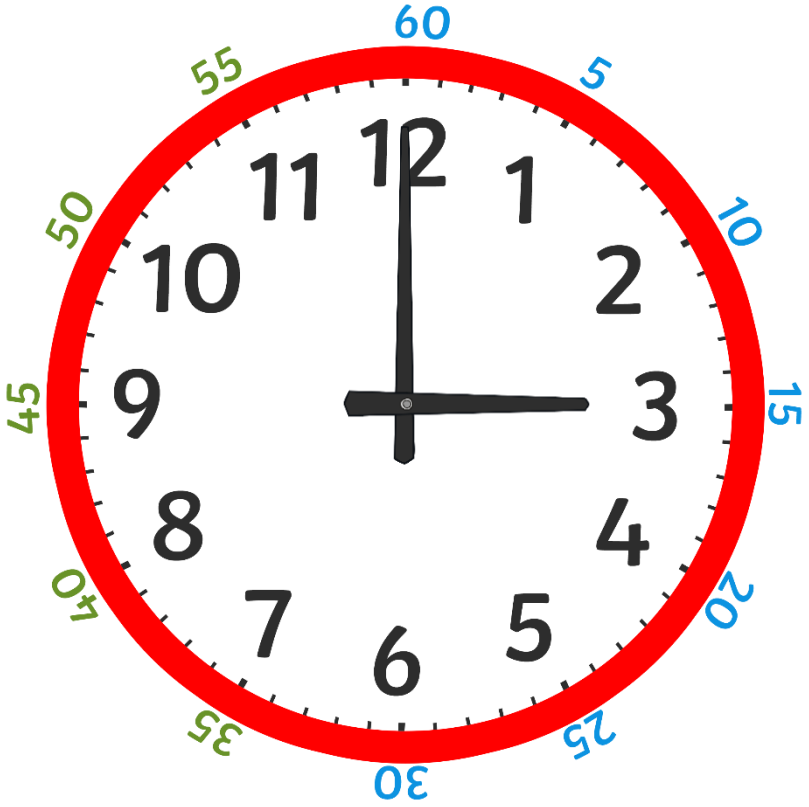
This clock shows the hours in black on the inside and the minutes in blue and green around the outside.



twinkl.com

To and Past

? Can you see a pattern between the hours on the inside and the minutes on the outside?



twinkl.com

To and Past

We read the time as minutes **past** or **to** the hour.

We can count **clockwise** around a clock to find how many minutes past the hour it is.

?

What time does the clock show?

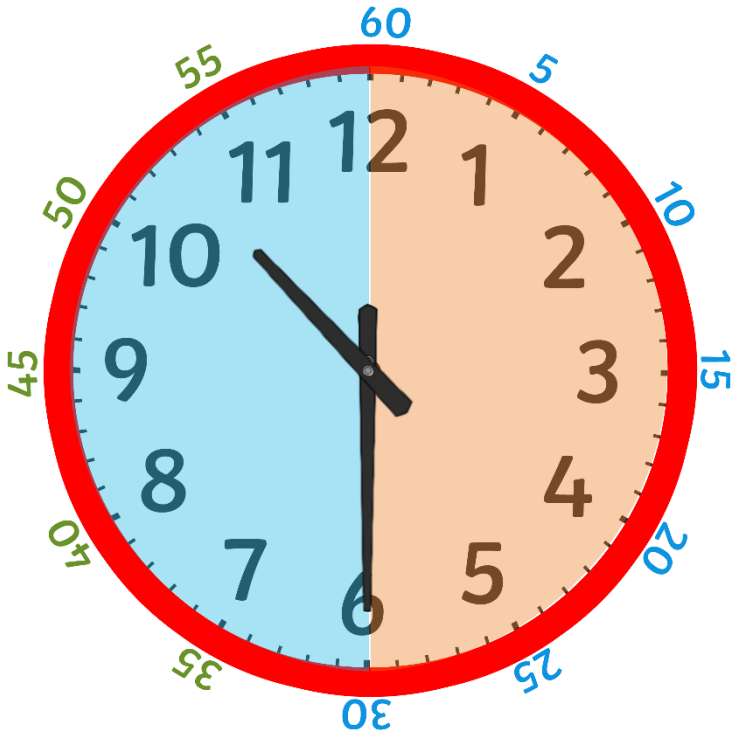
30 minutes past 4 half past 4

twinkl.com

To and Past

After the minute hand passes **half past**, the time stops being 'minutes past' and becomes 'minutes to'.

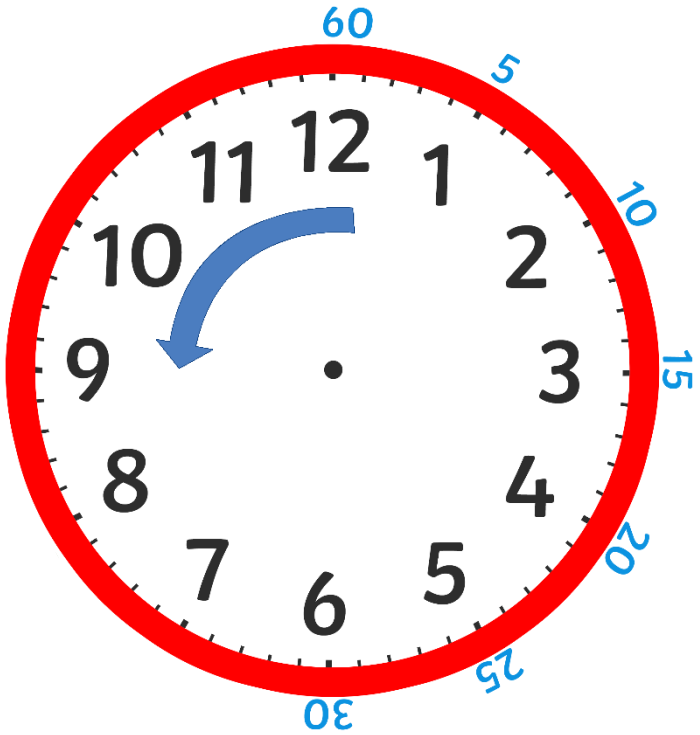


This is slightly trickier because the minutes on the outside of the clock are still counting past the hour.

twinkl.com

To and Past

When we find 'minutes to', we have to count back from the 12.
This is called '**anticlockwise**'.



Can you help count anticlockwise around the clock in 5s to half past?
