## Year 3 Maths: Divide 100 into 2, 4, 5 and 10 Equal Parts

Below are hundred squares.

Use colouring pencils, divide one into two, another into four, and the other ones into five and ten.

Can you write the division calculations underneath each hundred square?

$$100 \div \bigcirc = \triangle \times \square$$

$$100 \div \square = \square$$

$$100 \div \triangle = \square + \square$$

$$100 \div \bigstar = \square + \square + \triangle$$

What is the value of each shape?
